

Livermore 1 Station Fact Sheet

Station Description

- Existing Station Facilities: The proposed high speed rail station in the City of Livermore would not be located at an existing station site.
- Current City Plans: BART has purchased land near the Greenville Road/I-580 interchange for a possible terminal yard and/or station would be located and the City of Livermore General Plan advocates the extension of BART along the I-580 median to Greenville Road (Objective CIR-3.1, Action A3) (*City of Livermore General Plan: 2003- 2025*, Adopted February 9, 2004). The General Plan calls for the development of high density mixed use development near the proposed Greenville BART (Goal LU-3).

Proposed High Speed Rail Station Use

- Proposed Station Site: The proposed Livermore 1 site is located along I-580 just west of the intersection with North Livermore Avenue. This is a greenfield site and would require the placement of a new elevated railroad line in the median of I-580. The proposed station location is in an area of undeveloped open space. Residential development is located approximately 0.5 miles of the station site on the south side of I-580. North of I-580 the land is designated open space. The station site is within the City of Livermore urban growth boundary.
- Station Layout: The proposed station would be an elevated structure in the median of I-580. The upper level would have two high speed rail tracks served by a center platform and the lower level would have regional rail and express high speed rail served by a center platform.
- Parking: 1700 spaces would be provided in a 4-level parking deck.
- Access: Access to the station would be from North Livermore Avenue via an extension of Las Positas Circle.
- Intermodal Connections: The proposed station would be served by Tri-Valley buses.
